Ideation Phase
Empathize & Discover

Date	18 October 2023
Team ID	PNT2022TMID592946
Project Name	Project – Travel Insurance Predication using Machine Learning
Maximum Marks	4 Marks

Empathy Map Canvas:

Travel insurance is a vital aspect of travel planning that provides travelers with financial protection against unforeseen events that may occur during a trip. These events could include medical emergencies, flight cancellations, lost or stolen luggage, and other travel-related mishaps. With the rise in global travel, the demand for travel insurance has grown exponentially, with travelers looking for the most cost-effective and comprehensive coverage.
